I'm using ng-model and ng-init to use the age input to set the value to the model. I don't know how to get the age of the user. I want the value to be updated by the current user when I make an input. Here is my code : and here is my controller : var app = angular.module('MyApp', []); app.controller('MainCtrl', function (\$scope) { \$scope.age=34; \$scope.ligne=1
